

East Harbour is looking to retain the services of a

Freelance Graphic Designer

EAST HARBOUR

The East Harbour team is looking for a locally-based Graphic Designer, on a freelance basis, to provide ongoing design work in support of various campaigns and requests for this specific real estate development project.

Led by First Gulf, East Harbour is planned as a new commercial development in Toronto's east end. It is an important city building contributor in its economic impact as it is creating a new community for people to work, spend time and thrive in.

The ideal respondent has a love for Toronto, an interest in the urban development industry and an ability to effortlessly communicate a strong objective and multiple complex concepts through consistent and dynamic design.

The work will predominantly be in Adobe Creative Suite and the ask will be to create high-quality digital graphics, maps, images, infographics, PowerPoint presentations, brochures, advertisement and email marketing campaigns. The work may also be in select print form for such projects as in creating layouts, outdoor signage, posters and banners. Some photography may be required.

If you are an experienced, creative, resourceful, detail-oriented and highly-organized freelance design professional interested in this freelance opportunity and available to start immediately, please send an email with your resume, hourly rate, general monthly availability and a link to your online design portfolio, to: npastuszak@firstgulf.com, by **August 10, 2018**.
